Configuring Advanced Windows Server 2012 Services [70-412]

Contents

Module 1: Implementing Advanced Network Services

- Lesson 1: Configuring Advanced DHCP Features
- Lesson 2: Configuring Advanced DNS Settings
- Lesson 3: Implementing IPAM

Module 2: Implementing Advanced File Services

- Lesson 1: Configuring iSCSI Storage
- Lesson 2: Configuring BranchCache
- Lesson 3: Optimizing Storage Usage

Module 3: Implementing Dynamic Access Control

- Lesson 1: Overview of Dynamic Access Control
- Lesson 2: Planning for Dynamic Access Control
- Lesson 3: Deploying Dynamic Access Control

Module 4: Implementing Distributed Active Directory Domain Services Deployments

- Lesson 1: Overview of Distributed AD DS Deployments
- Lesson 2: Deploying a Distributed AD DS Environment
- Lesson 3: Configuring AD DS Trusts

Module 5: Implementing Active Directory Domain Services Sites and Replication

- Lesson 1: Overview of AD DS Replication
- Lesson 2: Configuring AD DS Sites
- Lesson 3: Configuring and Monitoring AD DS Replication

Module 6: Implementing Active Directory Certificate Services

- Lesson 1: PKI Overview
- Lesson 2: Deploying CAs
- Lesson 3: Deploying and Managing Certificate Templates
- Lesson 4: Implementing Certificate Distribution and Revocation
- Lesson 5: Managing Certificate Recovery

Module 7: Implementing Active Directory Rights Management Services

- Lesson 1: AD RMS Overview
- Lesson 2: Deploying and Managing an AD RMS Infrastructure
- Lesson 3: Configuring AD RMS Content Protection
- Lesson 4: Configuring External Access to AD RMS

Module 8: Implementing Active Directory Federation Services

- Lesson 1: Overview of AD FS
- Lesson 2: Deploying AD FS
- Lesson 3: Implementing AD FS for a Single Organization
- Lesson 4: Deploying AD FS in a B2B Federation Scenario

Module 9: Implementing Network Load Balancing

- Lesson 1: Overview of NLB
- Lesson 2: Configuring an NLB Cluster
- Lesson 3: Planning an NLB Implementation

Module 10: Implementing Failover Clustering

- Lesson 1: Overview of Failover Clustering
- Lesson 2: Implementing a Failover Cluster
- Lesson 3: Configuring Highly Available Applications and Services on a Failover Cluster
- Lesson 4: Maintaining a Failover Cluster
- Lesson 5: Implementing a Multi-Site Failover Cluster

Module 11: Implementing Failover Clustering with Hyper-V

- Lesson 1: Overview of Integrating Hyper-V with Failover Clustering
- Lesson 2: Implementing Hyper-V Virtual Machines on Failover Clusters
- Lesson 3: Implementing Hyper-V Virtual Machine Movement
- Lesson 4: Managing Hyper-V Virtual Environments by Using VMM

Module 12: Implementing Disaster Recovery

- Lesson 1: Overview of Disaster Recovery
- Lesson 2: Implementing Windows Server Backup
- Lesson 3: Implementing Server and Data Recovery
